**TURN OVER** FOR FUN GAMES AND CHALLENGES WITH OUR **CIVIL ENGINEERING SUPERHEROES!** 

## **EN-GENIUS! DISCOVER THE AMAZING WORLD OF CIVIL ENGINEERING!**

ice 200

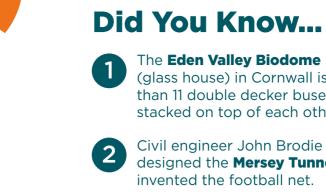

## What is engineering?

Engineers use maths and science to solve problems.

**Civil engineers work on the** BIG things that are all around us

**Fantastic facts** 

The Eden Valley Biodome (glass house) in Cornwall is higher than 11 double decker buses stacked on top of each other!

5

Civil engineer John Brodie who designed the Mersey Tunnel also invented the football net.

3

Civil engineers stopped Italy's famous Leaning Tower of Pisa toppling over about 20 years ago. The 800 year-old building still leans a bit (more than 3 degrees)!

Civil engineers are working on **hyperloops**: high-speed travel in 'pods' whizzing through tubes with no tracks or air. These could let us get around at 1000km/h - more than three times as fast as Japan's bullet train!

The **Danang Bridge** in Vietnam has a 600m long dragon sculpture built into it which breathes fire and water in a spectacular show every Saturday night!

These are

### Burj Khalifa

the world's tallest building

### Crossrail

digging giant tunnels for new underground railways in London

## How does civil engineering help us?

Can you imagine a world where we didn't have buildings to keep us safe and warm, with no transport or energy?

Civil engineers have created our modern world. They're working right now on today's problems like...

Getting clean water to people, including those in the poorest parts of the world

**Pollution-free** energy

Designing **buildings** that won't fall down during earthquakes

## I'm a civil engineer

#### **Brittany Harris**

The Institution of Civil

Superheroes for their 200th anniversary!

I help prevent people's homes and places of work from flooding and plan ways for people to reach safety during extreme weather.

I also help to provide access to clean water and sanitation (toilets and systems to deal with waste) in places around the world like Peru, Kenya, Saudi Arabia and the UK.

Engineers have made me into one of their Invisible

FLOODS DON HOW CIVIL ENGINEERS TRANSFORM LIVES AND SHAPE THE WORLD AROUND US
