

ICE South Branch Engineering Excellence Awards 2022

Deadline for Entries: Friday 22 April 2022

Awards Ceremony: Thursday 9 June 2022

E: SEE.Awards@ice.org.uk W: ice.org.uk

The Awards

ICE South Branch Engineering Excellence Awards celebrate outstanding sustainable civil engineering achievement, innovation and ingenuity in South Branch area which covers West Sussex, Hampshire and the Isle of Wight.

Previous ICE Award winning projects in South Branch include The Hard Interchange and Portsmouth Flood Alleviation Scheme.

The Awards will be presented on Thursday 9 June onboard the Princess Caroline Dinner Cruise.

Individual Achievement Awards

These awards recognise individuals making an outstanding contribution to the profession. Employers are invited to nominate their brightest and best.

Greatest Individual Contribution to the ICE South Branch and/or Sustainable Civil Engineering

For an individual who has best demonstrated the professionalism and integrity of a civil engineer and the values of the ICE. We are looking for those who have gone above and beyond to advance the ICE and profession and share the value of Civil Engineering in the community.

Steve Tebb Award for Individual Excellence in Schools Outreach

The Steve Tebb award honours the ICE Member that has shown outstanding commitment to civil engineering by giving their time to represent the ICE and promoting the profession to inspire the next generation.

One to Watch for Young Professionals

This award is designed to recognise the most accomplished and promising young professional. It is open to Graduate Engineers, Apprentices and Technicians who have greatly contributed to the profession in the last 12 months.

Judging criteria

A judging panel of senior ICE representatives will look for entries that clearly demonstrate how the individual has:

- Promoted sustainable civil engineering to the general public, young people and/or other professionals.
- Sought to develop and promote a culture of fairness and inclusion within their organisation or within the wider community.
- Demonstrated integrity and professionalism in their employment and voluntary activities.
- Used their enthusiasm to inspire, motivate and mentor others
- Developed innovative practices or ways of working that have had a tangible effect on a major project or in the industry.

Project Awards

Projects should be sufficiently implemented for an assessment of their in-service performance to be appraised. Projects of all sizes that have been built in the South Branch area are welcomed.

Successful projects will be expected to demonstrate innovation, creativity and social value whilst embedding a culture of safety, inclusion and sustainability.

One entry form is required to enter.

All shortlisted projects will be also be considered for the 'Champion of Champions' Greatest Contribution by a project to South Branch.

Award for Sustainability

This award recognises the best civil engineering intervention that has significantly improved the sustainability and resilience of a new or existing piece of infrastructure or a building. The judges will be assessing the difference the intervention made compared to other possible approaches in consideration of the United Nations Sustainability Development Goals.

Best Infrastructure Project

This award recognises civil engineering excellence in the design and construction of projects relating to transport; geotechnical; flood; costal defence; water supply or disposal, energy; waste or regeneration. It recognises the impact infrastructure has on the local or regional economy and the wellbeing of the people and businesses in it.

Community Benefit Award

This award recognises the contribution civil engineering makes to local communities. It may be given to a project that significantly benefits the community, or through close working with a community, ensured the construction and delivery of the final product brought additional benefits for local people, such as a school's programme or training schemes.

Innovation Award

This category rewards ground breaking developments in products, materials and ways of working that not only enhance outcomes of the project entered but also changes practices on future projects. The entry can apply to an entirely new method or to the development of an existing method to improve outcomes.

Judging criteria

All project entries should clearly demonstrate how they meet the following criteria:

Lower carbon and environmental initiatives

- All project must demonstrate a commitment to net zero and low carbon along with features incorporated during the design and /or adopted through the build of the projects.
- Explain the approach to reducing carbon emissions, bedded and in operation.
- Elaborate how the design team and the project addressed the challenges presented by the climate emergency
- Demonstrate measurable improvement to outcomes such as air quality and demand for energy and water.

Excellence in project management and financial control

- Set out how project outcomes compared to deadlines and budgets set
- Explain measures taken to remain on time and on budget.

Exemplary health and safety record

- Demonstrate actions taken to minimise accidents and maximise team wellbeing.
- Explain how health and safety learning from the project was incorporated into the business.
- Provide evidence that zero major accidents have occurred over the life of the project.

Innovative design, construction and use of technology

- Demonstrate innovation in methods used and use of materials to deliver project requirements and overcome challenges.
- Demonstrate how leading edge technology was used and the measurable benefits of doing so
- Explain how learnings from innovation are being shared with the wider industry

Positive impact on South Branch

- Set out how the project is making a difference to the locality of the project and to the lives of people living and working in the local area or wider region.
- Explain how the impact of the final design on the public's and user's perception and experience of the finished product was maximised.

Teamwork and inclusion

- Demonstrate collaborative working across organisations involved in the project.
- Explain your approach to the development and training of less experienced team members..
- Explain how an inclusive team environment was brought about.
- Demonstrate successful working with stakeholders.
- Demonstrate how the team worked with local communities to benefit local people throughout the life of the project as well as upon completion.

Judging Process

Entries will be assessed by a judging panel made up of ICE South East England members and senior representatives from South East England's built environment community and any specialists invited by the ICE South Branch. Entrants may be contacted by a member of the judging panel, should the judges require further information to reach their decision.

How to enter

- **Download** the relevant application form.
- **Complete** application form and send to see.awards@ice.org.uk by Friday 22 April 2022.
- **Provide** supporting images/documentation.
- **Submit** payment details (if applicable).

There is no fee for individual achievement award entries.

Project Award entry fee is £200+VAT per project .

Local Authority entries are free.

Payment can be made via the ICE website.

Projects will also be considered for the Greatest Contribution to South Branch Award.

Applicants should make clear who is entering the project award. Entries may be submitted in the name of an individual organisation, or a group of organisations.

Where entries are submitted by a group of organisations, the organisations in that group should represent the major disciplines delivering the project or intervention to enable scoring in each of the judging criteria.

Signing the confirmation on the Application Form confirms that the entrant has read and accepts the rules and submission requirements.

Please note: All documents and photographs submitted as part of the entry may be used in future ICE publicity material, unless specifically requested otherwise. ICE will assume that the person(s) submitting the entry have obtained the necessary permissions to use the supporting material for the entry and associated ICE publicity, and have also informed all relevant parties of the entry submission.
